## FORMAL SOLUTION

On this page you should aim to consolidate, formalise and clearly explain your solution to the problem. It should turn the messiness that was your original work on the problem into a clear piece of work that anyone would be able to follow and make sense of. The aim is to be clear and detailed in describing exactly what you did and why.

**The Question(s)** – State the question(s) that you are investigating.

**Mathematical Method** – Describe what you did, how you solved the problem, what maths you used and why.

**Mathematical Results** – Write the calculations, equations, graphs, tables, diagrams etc that you did below.

**Conclusions Reached** – Describe what you found out about the original problem, what did you learn?
